Measures

Therapy Outcome Measures Enderby and John (2015)

TOMs describe four dimensions using the International Classification of Functioning, Disability and Health (WHO, 2007)

- Impairment – the severity of the presenting difficulty /condition
- Activity – the impact of the difficulty on the individual's independence
- Participation – the impact on levels of social engagement and autonomy
- Wellbeing - Impact on mental and emotional wellbeing

Each dimension is measured on an 11 point scales with six descriptors ranging from 0 (worse) to 5 (best)

First Step

Do TOMs !!

If not now when ?

Change will not come if we wait for some one else to do it.

Aim for excellent get very good

Aim for very good get ok

Data Collection

A new data collection sheet to be completed for every episode of care.

Updated March 2019

Therapist Name: _____
Patient/Client Identity (Hospital No.): _____
Care Spell Number : _____ Episode of Care Number: _____

Employing Authority: Swansea Bay University Health Board

Profession: Speech and Language Therapy

PIMS Team/ Clinic Location: (circle as applicable)

PSCN/HI/Paed Dysphagia/Pre School Community/School Age Community (SBS)/Lang units/LD-Special Schools /Dysfluency/Flying Start

NPT/SWA

Patient/Client Details

Date of Birth: ____ / ____ / ____
dd mm yyyy

Carer: _____ (person rated)

Gender (M/F/O): _____

Comments: _____

Next Step

Do TOMs Reliably!!

- Clinical Team meetings- inter rater reliability
- TOMS trainers monitoring trends and considering training needs

	Nov 2016 - Feb 2017	March 2017 - June 2017
Average	78%	89%
Range	20%-100%	70%-100%

What can we do?

Analyse by aetiology

Analyse by impairment

Analyse by severity

Determine change and distribution of change (i.e. Where are we making what difference)

Influencing Service Change

Parkinson's Disease Groups Median Score 4

Mild Difficulties -

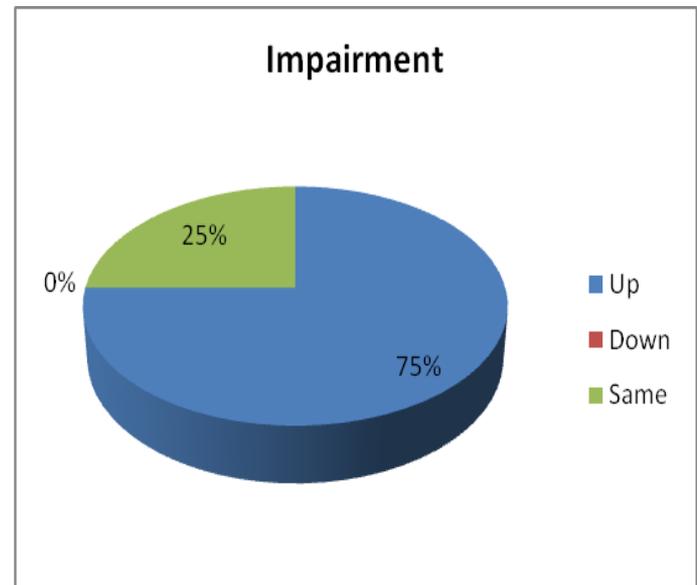

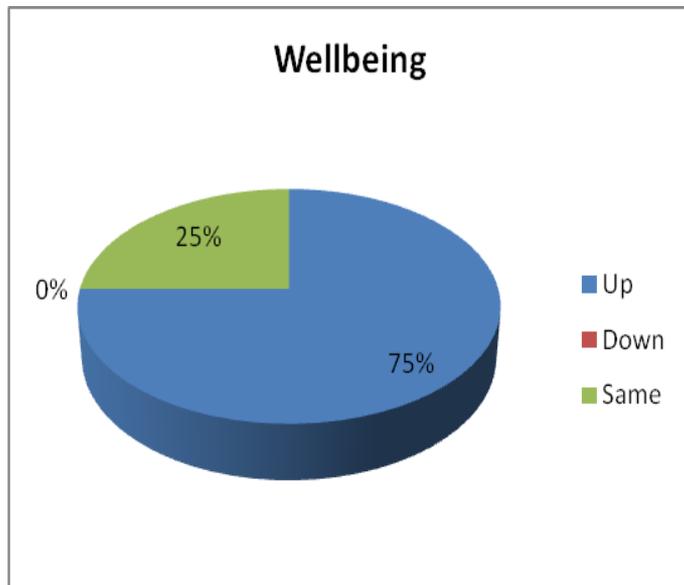

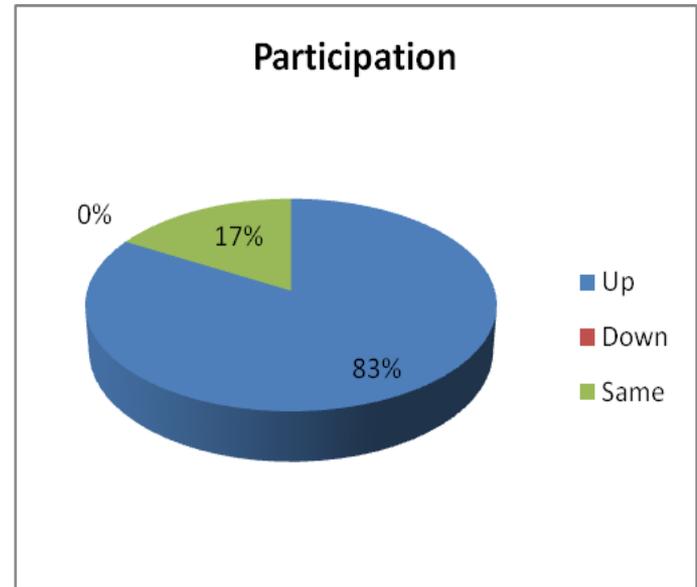

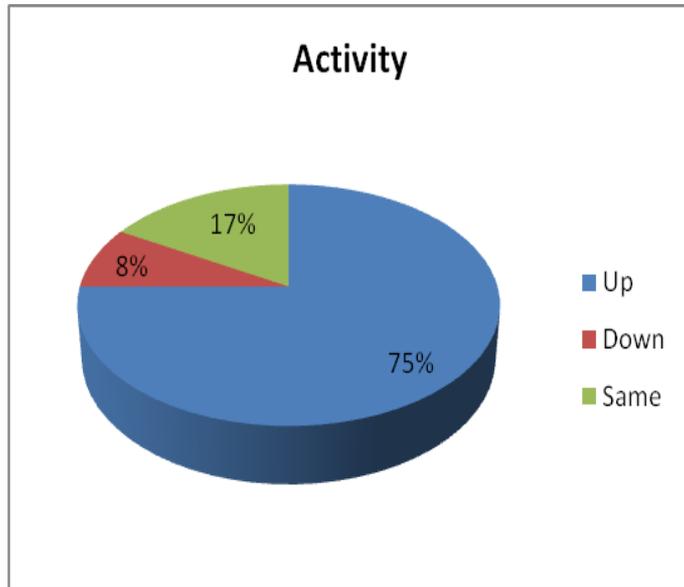

Outcomes – Mild Difficulties Group

Group started with median score of '4' (mild difficulties) across all parameters.

86% of patients either maintaining or improving their scores in all domains.

This can be seen as a significant improvement.

Advanced Difficulties - Median Score 3

Outcomes Advanced Difficulties Group

Positive outcomes with either maintenance or improvement in all domains

SLT intervention was successful for this cohort as well as those with milder difficulties.

Preschool Service

Paper based triage of referrals leading to initial assessment

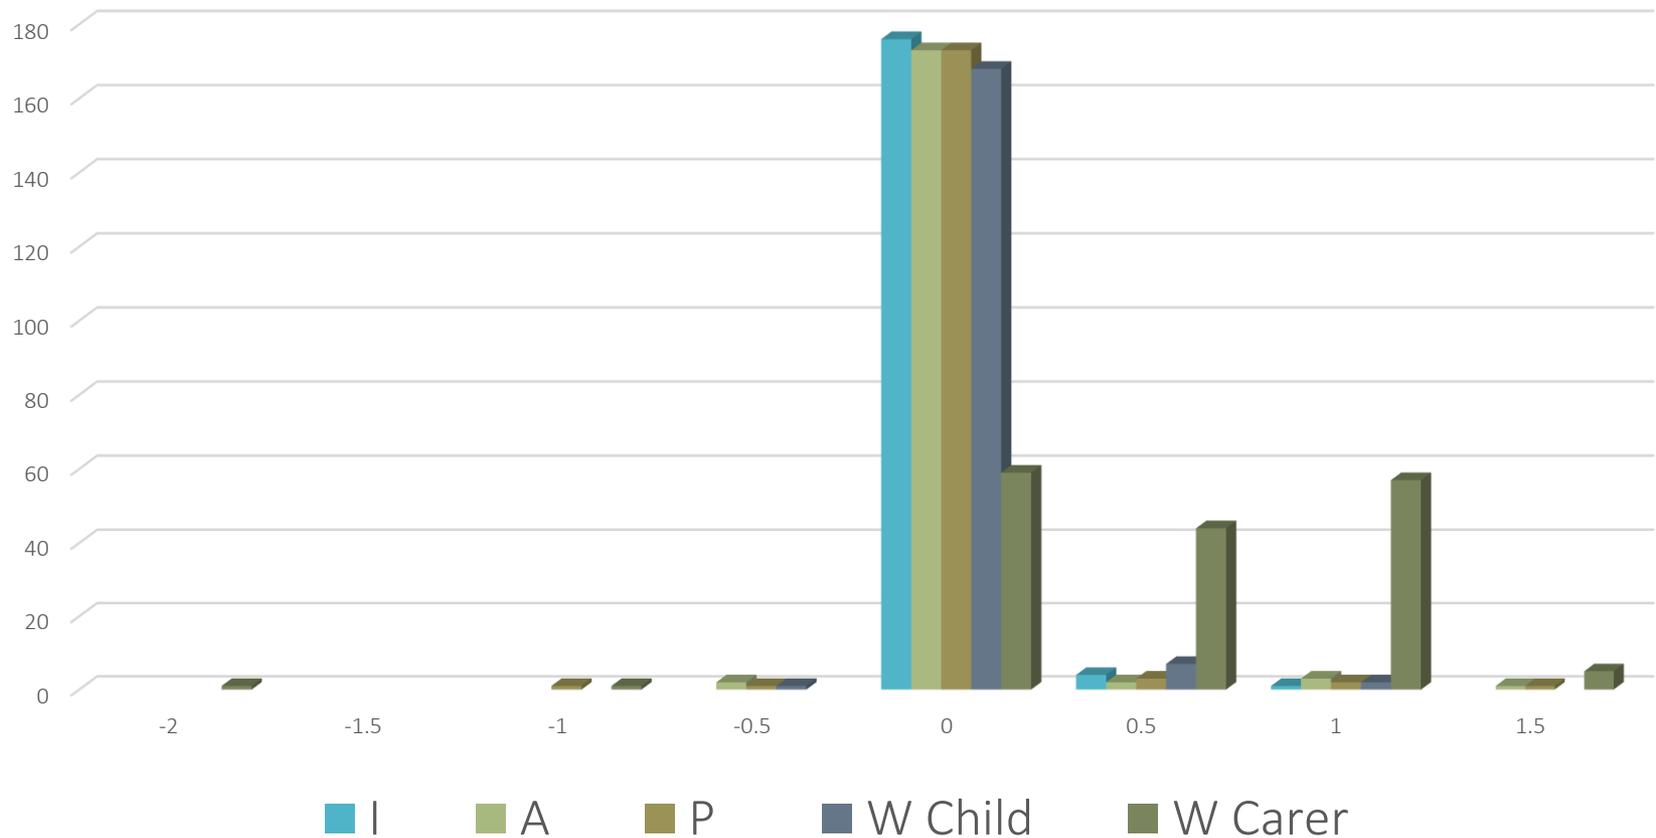

42% children attending for initial assessment closed after one contact.

Clinicians strongly felt assessment was still appropriate as Parents valued advice given and this had positive impact on their wellbeing.

Analysed 120 children attending Core SLT appointments who were closed after 1 contact

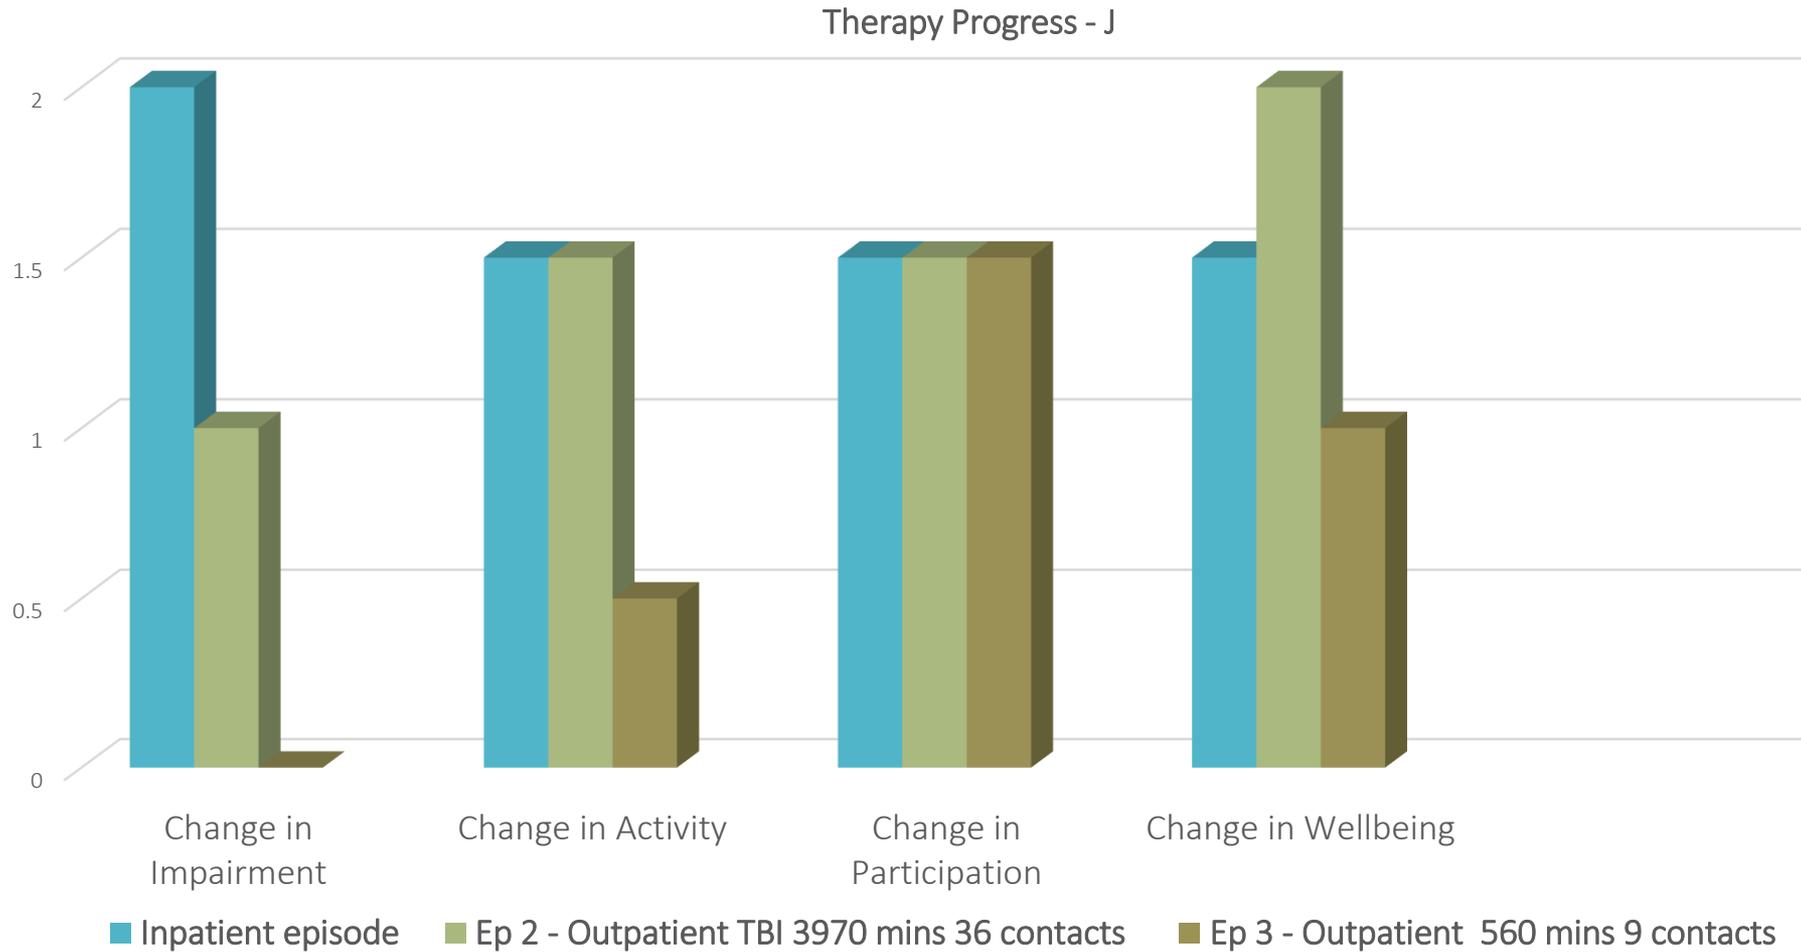

TOMs data supporting need for change:

Change within session

Example of Influencing funding

Patient J Complex Brain Injury

*“the journey can be uphill, but
you can always turn, admire
the view and then carry on”
(Koziel, 2017)*
